

Landmark Homes

We build fully customized homes in the Tri-Cities and Southwest Washington. Landmark Homes was established by Mark Questad, who has over twenty years experience in every aspect of new home construction. Landmark Homes and our partners pride ourselves on flexibility and affordability.

Landmark Homes has built a reputation of being "The Buyer's Builder." We have designed a wide variety of house plans to fit the needs of anyone in the market for a quality home. Building on one of our prime lots or a lot you already own, we have a plan that will work for you. Although we can customize to fit your needs, we have built our reputation on a philosophy of quality as a standard feature, with no need to break your budget with the upgrades you need in a home. We've already made the upgrades, without upgrading the price.

With an impressive list of features that are standard in our homes, we feel that we have surpassed other builders who offer "bare bones" houses and a list of expensive options.

Since our reputation depends on your satisfaction, we make it a priority to ensure that your Landmark home fits your personal needs. We believe that our combination of quality and affordability is difficult to beat, and combined with a range of homes for any budget, Landmark Homes is the builder you've been looking for.
